TOWN AND COUNTRY PLANNING ACT 1990

In pursuance of the powers vested in the Amber Valley Borough Council under the above Act and Orders and taking into account Government policy and guidance and the saved policies of the Adopted Amber Valley Borough Local Plan 2006, and with reference to your application (**Office Code: AVA/2020/1219**) which was valid on the 7 January 2021 for permission for **Proposed Warehouse/storage building at D & D Transport Ltd Cromford Road Langley Mill**

In the manner described in the application and shown on the accompanying plan(s) and drawing(s) **NOTICE IS HEREBY GIVEN** that permission for the proposed development is **GRANTED subject to the following conditions:**

Conditions/Reasons

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

   Reason: To comply with the requirements of Section 91(1) of the Town and Country Planning Act, 1990, as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

2. The development hereby permitted shall be carried out only in accordance with the details and specifications shown on the following drawings:

   - Site Location Plan drawing no. DD_08;
   - Site Plan drawing no. DD_07 Rev A;

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

- Site Plan drawing no. DD_03 Rev A;
- Floor Plan drawing no. DD_06;
- Elevations and layout drawing no. DD_05;
- Building Frame details drawing no. DD_04;
- North and East elevations drawing no. DD_02;
- South and West elevations drawing no. DD_01;
- Design and Access Statement dated 6/12/2020;
- Coal Mining Risk Assessment dated 19 May 2016;
- Environmental Noise Assessment dated July 2016; and,
- Flood Risk Assessment and Drainage Strategy dated 14 May 2021.

Reason: In order to define the permission.

3. a) No development shall commence until:
i. The approved development site has been subjected to a detailed investigation to determine the extent, scale and nature of any contamination and an assessment of the potential risks (the "Assessment") has been carried out.
ii. A report providing the details of the site investigation and the Assessment been submitted and approved in writing by the Local Planning Authority.
iii. A Remediation Method Statement (the "RMS") to address any remediation required by the Assessment including a plan for how the remediation methods will be verified, has been submitted and approved in writing by the Local Planning Authority.

b) The development shall be undertaken in strict compliance with the requirements contained within the approved RMS. Any proposed revisions to the RMS must be submitted and approved in writing by the Local Planning Authority prior to any changes in remediation methods.

c) If during development works, any contamination is encountered which was not previously identified and is derived from a different source and/or of a different type to those already identified, then no further works shall take place until a revised RMS is submitted to and approved in writing by the Local Planning Authority and the works shall then be carried out in accordance with the revised RMS.

d) If during development work, site contamination is found in areas previously expected to be uncontaminated, then the remediation of those areas shall be carried out in accordance with the approved RMS.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

e) No building shall be occupied unless and until a Verification Report in accordance with the RMS has been submitted to and approved in writing by the Local Planning Authority.

f) All investigations, assessments and reports must be carried out by a suitably qualified competent person previously agreed in writing by the Local Planning Authority and in accordance with the Environment Agency publication Land contamination: risk management (LCRM).

Reason: The undertaking of a site investigation prior to the commencement of development is necessary to ensure that adequate information pertaining to risks arising from land contamination is available to inform an assessment that the site is either suitable for its proposed use or appropriate remedial measures could make the site suitable for its proposed use. In order to ensure the safety of the development, in accordance with saved policy EN18 of the Adopted Local Plan 2006 and paragraphs 178 and 179 of the National Planning Policy Framework.

4. Before the first use of the premises, space shall be provided within the application site in accordance with the application drawings for the parking and manoeuvring of staff, customers' and service and delivery vehicles, laid out, surfaced and maintained throughout the life of the development free from any impediment to its designated use.

   Reason: In the interests of the safety of the users of the access and public highway safety in general in accordance with saved policy TP1 of the Adopted Amber Valley Borough Local Plan 2006.

5. The premises, the subject of the application, shall remain ancillary to the main use of the site for the lifetime of the development.

   Reason: In the interests of the safety of the users of the access and public highway safety in general in accordance with saved policy TP1 of the Adopted Amber Valley Borough Local Plan 2006.

6. No development shall commence until;

   a) a scheme of intrusive investigations has been carried out on site to establish the risks posed to the development by past shallow coalmine workings, and;

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

b) any remediation works and/or mitigation measures to address land instability arising from shallow workings, as may be necessary, have been implemented on site in full in order to ensure that the site is safe and stable for the development proposed.

The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.

Reason: This pre-commencement condition is required to ensure that effective remedial or mitigating measures are taken to treat, control or contain unstable land in accordance with saved policy EN18 of the Adopted Amber Valley Borough Local Plan 2006 and paragraphs 183 and 184 of the National Planning Policy Framework.

7. Prior to the occupation of the development, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by shallow coalmine workings.

   Reason: To ensure that effective remedial or mitigating measures have been undertaken to treat, control or contain unstable land in accordance with saved policy EN18 of the Adopted Amber Valley Borough Local Plan 2006 and paragraphs 178 and 179 of the National Planning Policy Framework.

8. The development hereby permitted must not be commenced until such time as a scheme to:

   - ensure no raising of ground levels, with finished floor levels of the proposed building hardstanding being no higher than the existing ground level;
   - provide revised elevations plans showing that the proposed structure comprises a permanent side void to at the base of the sides to allow water to enter the interior freely (as detailed within paragraph 4.1.3 of the flood risk assessment (ref 20-0428, dated 14th May 2021 and produced by BSP Consulting);

   has been submitted to, and approved in writing by, the Local Planning Authority. The development shall be constructed in accordance with the agreed details and maintained for the life of the development.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

Reason: To ensure that there are no detrimental impacts to flood storage or flood flow routes in accordance with saved policy EN15 of the Adopted Amber Valley Borough Local Plan 2006.

9. If, during development, contamination not previously identified is found to be present at the site then no further development shall be carried out until a remediation strategy detailing how this contamination will be dealt with has been submitted to, and approved in writing by, the Local Planning Authority. The remediation strategy shall be implemented in accordance with the agreed details.

   Reason: To ensure that there are no detrimental impacts to flood storage or flood flow routes in accordance with saved policy EN15 of the Adopted Amber Valley Borough Local Plan 2006.

   To ensure that the development does not contribute to, and is not put at unacceptable risk from or adversely affected by, unacceptable levels of water pollution from previously unidentified contamination sources at the development site in accordance with saved policy EN18 of the Adopted Amber Valley Borough Local Plan 2006 and paragraph 174 of the National Planning Policy Framework.

10. No work shall commence on the footings of the hereby approved development until such time as a scheme indicating proposed floor levels of all buildings, and the relationship of such to the existing dwellings has been submitted to and approved by the Local Planning Authority, and the development shall be constructed in accordance with the agreed levels.

    Reason: To safeguard the privacy and amenities of the occupiers of adjoining properties in accordance with saved policies LS3 and H12 of the Adopted Amber Valley Borough Local Plan 2006.

11. No development shall take place on the external elevations of the hereby approved development until there has been submitted to and approved in writing by the Local Planning Authority details and/or samples of the materials and finishes to be used for the external elevations and roof of the proposal, and the development shall be carried out with those materials.

    Reason: To ensure the satisfactory appearance of the completed development in accordance with saved policies LS3 and ER11 of the Adopted Amber Valley Borough Local Plan 2006.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

12. The warehouse/storage building hereby permitted shall be used only for the purposes stated in the supporting documents, namely, as an undercover storage and transfer area for the protection of goods while being transferred to smaller delivery vehicles.

    Reason: For the avoidance of doubt and to protect the amenity of the residents of adjacent properties in accordance with saved policy EN16 of the Adopted Amber Valley Borough Local Plan 2006.

13. All vehicle movements associated with the development shall be carried out only between 07:00 and 19:00 hours on Mondays to Fridays.

    Reason: To protect the amenity of the residents of adjacent properties in accordance with saved policy EN16 of the Adopted Amber Valley Borough Local Plan 2006.

14. The forklifts used in association with the development shall be powered electrically and fitted with a broadband reversing warning alarm. No horns shall be sounded on any vehicle at any time.

    Reason: To protect the amenity of the residents of adjacent properties in accordance with saved policy EN16 of the Adopted Amber Valley Borough Local Plan 2006.

15. No fixed or mobile refrigeration plant shall be operated on site.

    Reason: To protect the amenity of the residents of adjacent properties in accordance with saved policy EN16 of the Adopted Amber Valley Borough Local Plan 2006.

16. No indoor or outdoor artificial lighting associated with the development shall be installed unless full details of its design, location, illuminance levels, orientation and operating times have first been agreed with the Local Planning Authority. All works shall be fully implemented in accordance with the approved scheme before use commences.

    Reason: To protect the amenity of the residents of adjacent properties in accordance with saved policy EN16 of the Adopted Amber Valley Borough Local Plan 2006.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

Notes

Attention is drawn to the attached notes:

1 The Coal Authority advise the applicant of the following:

Under the Coal Industry Act 1994 any intrusive activities, including initial site investigation boreholes, and/or any subsequent treatment of coal mine workings/coal mine entries for ground stability purposes require the prior written permission of The Coal Authority, since such activities can have serious public health and safety implications. Failure to obtain permission will result in trespass, with the potential for court action. In the event that you are proposing to undertake such work in the Forest of Dean local authority area our permission may not be required; it is recommended that you check with us prior to commencing any works. Application forms for Coal Authority permission and further guidance can be obtained from The Coal Authority's website at: https://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

2 The Lead Local Flood Authority (LLFA) advises the applicant of the following:

Advisory/Informative Notes (It should be noted, that the information detailed below (where applicable), will be required as an absolute minimum in order to discharge any of the drainage conditions set by the LPA):
A. The County Council does not adopt any SuDS schemes at present (although may consider ones which are served by highway drainage only). As such, it should be confirmed prior to commencement of works who will be responsible for SuDS maintenance/management once the development is completed.

B. Any works in or nearby an ordinary watercourse may require consent under the Land Drainage Act (1991) from the County Council. For further advice, or to make an application please contact Flood.Team@derbyshire.gov.uk.

C. No part of the proposed development shall be constructed within 3-8m of an ordinary watercourse and a minimum 3 m for a culverted watercourse (increases with size of culvert). It should be noted that DCC have an anti-culverting policy.

D. The applicant should be mindful to obtain all the relevant information pertaining to proposed discharge in land that is not within their control, which is fundamental to allow the drainage of the proposed development site.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

E. The applicant should demonstrate, to the satisfaction of the Local Planning Authority, the appropriate level of treatment stages from the resultant surface water discharge, in line with Table 4.3 of the CIRIA SuDS Manual C753.

F. The County Council would prefer the applicant to utilise existing landform to manage surface water in mini/sub-catchments. The applicant is advised to contact the County Council's Flood Risk Management team should any guidance on the drainage strategy for the proposed development be required.

G. The applicant should provide a flood evacuation plan which outlines:

The flood warning procedure
A safe point of extraction
How users can safely evacuate the site upon receipt of a flood warning
The areas of responsibility for those participating in the plan
The procedures for implementing the plan
How users will be made aware of flood risk
How users will be made aware of flood resilience
Who will be responsible for the update of the flood evacuation plan

H. Flood resilience should be duly considered in the design of the new building/s or renovation. Guidance may be found in BRE Digest 532 Parts 1 and 2, 2012 and BRE Good Building Guide 84.

I. Surface water drainage plans should include the following:
Rainwater
pipes, gullies and drainage channels including cover levels.
Inspection chambers, manholes and silt traps including cover and invert levels.
Pipe sizes, pipe materials, gradients and flow directions and pipe numbers.
Soakaways, including size and material.
Typical inspection chamber / soakaway / silt trap and SW attenuation details.
Site ground levels and finished floor levels.

J. On Site Surface Water Management;

The site is required to accommodate rainfall volumes up to 1 in 100 year return period (plus climate change) whilst ensuring no flooding to buildings or adjacent land.

The applicant will need to provide details and calculations including any below ground storage, overflow paths (flood routes), surface detention and infiltration areas, etc, to

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

demonstrate how the 100 year + 30% Climate Change rainfall volumes will be controlled and accommodated, also incorporating a sensitivity test to 40% Climate change. In addition an appropriate allowance should be made for urban creep throughout the lifetime of the development (to be agreed with the LLFA).

Production of a plan showing above ground flood pathways (where relevant) for events in excess of 1 in 100 year rainfall, to ensure exceedance routes can be safely managed.

A plan detailing the impermeable area attributed to each drainage asset (pipes, swales, etc).

Peak Flow Control
For greenfield developments, the peak run-off rate from the development to any highway drain, sewer or surface water body for the 1 in 1 year rainfall event and the 1 in 100 year rainfall event, should never exceed the peak greenfield run-off rate for the same event.

For developments which were previously developed, the peak run-off rate from the development to any drain, sewer or surface water body for the 1 in 1 year rainfall event and the 1 in 100 year rainfall event must be as close as reasonably practicable to the greenfield run-off rate from the development for the same rainfall event, but should never exceed the rate of discharge from the development, prior to redevelopment for that event.

Volume Control
For greenfield developments, the runoff volume from the development to any highway drain, sewer or surface water body in the 1 in 100 year, 6 hour rainfall event must not exceed the greenfield runoff volume for the same event

For developments which have been previously developed, the runoff volume from the development to any highway drain, sewer or surface water body in the 1 in 100 year, 6 hour rainfall event must be constrained to a value as close as is reasonably practicable to the greenfield runoff volume for the same event, but must not exceed the runoff volume for the development site prior to redevelopment for that event.

Note:- If the greenfield run-off for a site is calculated at less than 2 l/s, then a minimum of 2 l/s could be used (subject to approval from the LLFA).

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

Details of how the on-site surface water drainage systems shall be maintained and managed after completion and for the lifetime of the development to ensure the features remain functional.

Where cellular storage is proposed and is within areas where it may be susceptible to damage by excavation by other utility contractors, warning signage should be provided to inform of its presence. Cellular storage and infiltration systems should not be positioned within the highway.

Guidance on flood pathways can be found in BS EN 752.

The Greenfield runoff rate which is to be used for assessing the requirements for limiting discharge flow rates and attenuation storage for a site should be calculated for the whole development area (paved and pervious surfaces - houses, gardens, roads, and other open space) that is within the area served by the drainage network whatever size of the site and type of drainage system. Significant green areas such as recreation parks, general public open space etc., which are not served by the drainage system and do not play a part in the runoff management for the site, and which can be assumed to have a runoff response which is similar to that prior to the development taking place, may be excluded from the greenfield analysis.

K. If infiltration systems are to be used for surface water disposal, the following information must be provided:
Ground percolation tests to BRE 365.
Ground water levels records. Minimum 1m clearance from maximum seasonal groundwater level to base of infiltration compound. This should include assessment of relevant groundwater borehole records, maps and on-site monitoring in wells.
Soil / rock descriptions in accordance with BS EN ISO 14688-1:2002 or BS EN ISO 14689-1:2003.
Volume design calculations to 1 in 100 year rainfall + 30% climate change standard. An appropriate factor of safety should be applied to the design in accordance with CIRIA C753 - Table 25.2.
Location plans indicating position (soakaways serving more than one property must be located in an accessible position for maintenance). Soakaways should not be used within 5m of buildings or the highway or any other structure.
Drawing details including sizes and material.
Details of a sedimentation chamber (silt trap) upstream of the inlet should be included.
Soakaway detailed design guidance is given in CIRIA Report 753, CIRIA Report 156 and BRE Digest 365.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

L. All Micro Drainage calculations and results must be submitted in .MDX format, to the LPA. (Other methods of drainage calculations are acceptable.)

M. The applicant should submit a comprehensive management plan detailing how surface water shall be managed on site during the construction phase of the development ensuring there is no increase in flood risk off site or to occupied buildings within the development.

Reasons for Granting Permission

In granting permission for this development the Borough Council has taken into account all material planning considerations arising from the views of statutory and other consultees and public representations about the application, Government guidance as detailed in the National Planning Policy Framework and the saved policies of the Adopted Amber Valley Borough Local Plan 2006:

LS1 - Sustainability criteria
LS3 - Design
ER5 - Industrial and storage development
ER11 - Quality and design of development
EN15 - Development and Flood Risk
EN16 - Pollution
EN18 - Derelict, Unstable And Contaminated Land
TP1 - Impact on the Transport Network
TP6 - Parking

In detail:

The National Planning Policy Framework (NPPF) is a material consideration in planning decisions. In accordance with Paragraph 38 of the NPPF the local planning authority has approached the decision making process in a positive way to foster the delivery of sustainable development and has worked proactively with the applicant/agent to secure a development to improve the economic, social and environmental conditions of the area.

The development complies with the provisions of the development plan for the locality and raises no unresolved issues in relation to the location of the site, privacy, amenity, character and design, landscape or heritage features and highway safety.

Date : 8 November 2021 Signed

Julian Townsend
Executive Director (Operations)

NOTES

1. **If the applicant is aggrieved by the decision of the Local Planning Authority to refuse planning permission or approval for the proposed development or to grant permission or approval subject to conditions, he may appeal to the Secretary of State for the Environment in accordance with Section 78/79 of the Town and Country Planning Act 1990, within six months of the date of this notice. The Secretary of State has power to allow a longer period for the giving of a notice but will not normally be prepared to exercise this power unless there are special circumstances which excuse the delay in giving notice of appeal. The Secretary of State is not required to entertain an appeal if it appears to him that permission of the proposed development could not have been granted by the Local Planning Authority or could not have been so granted otherwise that subject to the conditions imposed on them, having regard to the statutory requirements, to the provision of the development order, and to any directions given under the order.**
2. **Cadent Gas own and operate the gas infrastructure within the area of your development. Contact Cadent's Plant Protection Team for approval before carrying out any works on site and ensuring requirements are adhered to. Email plantprotection@cadentgas.com. Alternatively you can register on www.beforeyoudig.nationalgrid.com**
3. **If permission to develop land is refused or granted subject to conditions, whether by the Local Planning Authority or by the Secretary of State for the Environment, and the owner of the land claims that the land has become incapable of reasonably beneficial use in its existing state and cannot be rendered capable of reasonably beneficial use by the carrying out of any development which has been or would be permitted, he may serve on the Council of the County/District in which the land is situated, a purchase notice requiring that council to purchase his interests in the land in accordance with the provisions of Section 180 of the Town and Country Planning Act 1990.**
4. **In certain circumstances a claim may be made against the Local Planning Authority for compensation where permission is refused or granted subject to conditions by the Secretary of State on appeal or on a reference of the application to him. The circumstances in which such compensation is payable are set out in Sections 137 and 138 of the Town and Country Planning Act 1990.**
5. **This permission relates to planning controls only. Any other statutory consent necessary including submission under the building regulations must be obtained from the appropriate Authority.**
6. **If it is intended to give notice of appeal in accordance with Paragraph 1 above, this should be done on the appropriate form obtainable from:-**

   The Planning Inspectorate
   3/23 Hawk Wing, Temple Quay House, 2 The Square Temple Quay Bristol BS1 6PN
   (Tel. No. 0117 372 8000) www.planning-inspectorate.gov.uk

7. **If the condition of consent or reasons for refusal, make reference to a Division of the Department, the appellant may, if he so wishes, require the attendance of a representative from the Department by notification to the Local Planning Authority. Such a representative would not be liable to cross-examination on questions of departmental policy, but only on matters of fact and expert opinion in relation to the appeal site.**
8. **Where a vehicle is habitually drive across a grass verge or kerbed footway to and from premises adjoining a highway, the occupier of the premises may after being given due notice by the appropriate authority, be required to pay the cost of construction of a carriage crossing or the strengthening of a footway, as the authority considers it necessary, or may be required to comply with conditions imposed by the authority.**
9. **In the case of building or premises to which the public are to be admitted whether on payment or otherwise, attention is drawn to Sections 4 and 7 of the Chronically Sick and Disabled Persons Act 1970 and the associated Code of Practice (BS5810:1979). In the case of premises to which the Offices, Shops and Railway Premises Act 1963 or the Factories Act 1962 applies, attention is drawn to Sections 7 and 8A of the Chronically Sick and Disabled Persons Act and to the same code of practice. In the case of Educational Buildings, attention is drawn to Sections 7 and 8 of the Chronically Sick and Disabled Persons Act 1978 and to the Design Note 18 "Access for the Physically Disabled Educational Buildings".**
10. **If the development site is crossed by an electric line or is within 15 metres (50ft) of the nearest part of a line (measure horizontally along the ground) or if there is reason to believe that it may be crossed by an underground electric cable, the applicant should contact the Electricity Board to ascertain if and what special safety precautions are necessary.**
11. **The grant of planning permission does not entitle developers to obstruct a public right of way. Development on so far as it affects a right of way, should not be started, and the right of way should be kept open for public use, until the necessary order under Section 247 and 257 of the Town and Country Planning Act 1990 for the diversion of extinguishment of the right of way has been made and confirmed.**

pe
