Site Location Plan and Floor Plan received 21st July 2016

Reason: In order to define the permission.

3. Prior to commencement of use of the hereby approved restaurant/cafe details of the kitchen cooking extraction/ventilation system shall be first submitted to, and approved in writing by, the Local Planning Authority. The system shall be appropriate to the nature and quantity of cooking done and sufficient to control the emission of fumes and smell from the premises such that the residential amenity of nearby premises is not materially affected. All equipment installed as part of the approved scheme shall thereafter be operated and maintained in accordance with that approval and retained for so long as the use continues.

   Reason: To protect the amenity of the residents of adjacent properties in accordance with policy EN16 of the Adopted Amber Valley Borough Local Plan 2006.

Notes
Attention is drawn to the attached notes:

1 Advisory Note (condition 3)
The appropriateness of the kitchen cooking extraction/ventilation system will depend on the nature and quantity of cooking done; for example, a domestic kitchen system is unlikely to adequately deal with the cooking odours associated with large amounts of deep fat frying or boiling and it may be necessary to install commercial equipment, including an elevated chimney flue, to ensure that:

The standard of odour suppression is sufficient to ensure that no significant odour is detectable at any odour-sensitive premises;
The extracted air is discharged at such a height, position and direction as to ensure the adequate dilution and dispersal of cooking odours;
The airflow from any chimney is unimpeded; i.e. the final opening of the chimney must discharge vertically upwards and must not be fitted with any restriction such as a plate, cap or cowl at the final opening. An accelerator cone or similar device could be included to increase the exit velocity of emissions;

Noise to the environment is controlled by taking acoustic considerations into account within duct, fan and termination design.
Further advice on best practice for the design and operation of commercial kitchen ventilation systems can be found in the document 'Guidance on the Control of Odour and Noise from Commercial Kitchen Exhaust Systems' (DEFRA, January 2005) at:
