Fortitude™ PPC coated black bow top concrete in panel for fencing applications. Bow top fencing, so called because of its distinctive rounded safety top, is a traditional design which can turn a perimeter fence into an attractive feature. It is usually seen in public andamp; recreation areas, combining security with aesthetics. Used largely because of its economical and durable qualities but also because of its pleasing appearance.

Dimensions

- Fence height: 900mm
- Post centres: 2810mm
- Bar size: Ø 12mm
- Includes: panel, post, cleats and fixings.
