This drawing is to be read in conjunction with appropriate consultant engineers drawings, schedules, specification and manufacturers information.

A tree protection plan to be submitted prior to the commencement of any work on site, including the removal of the shed / garage. The plan show the position of temporary protective fencing for the trees along the drive and ground protection for the root protection area of the cedar tree between the tree and the proposed development. The temporary protective fencing and ground protection should follow BS5837-2012. the approved tree protection measures to be installed prior to the commencement of any works on site and maintained throughout. No change in levels, excavation, fires, storage of materials, passage of vehicles or plant, cement mixing discharge of liquids within the protected areas. No passage of vehicles or plant through the area of ground protection if greater than the designed load capacity of the ground protection.
