Supporting Information

There is no specific drawing or drawings to be substituted by this proposed NMA; the erection of the new school buildings approved under AVA/2023/0873 does not depend on removing the existing archway; the approved 'proposed elevations' only show the new buildings in their entirety with no reference to the existing archway. Therefore 'Arch NMA 02 Rev A elevations' is proposed as a new elevation drawing to be included in the list of approved drawings (Condition 02).

Drawing 'Arch NMA 01 Rev A', (block plan) provided for this NMA shows the retention of the archway. As the arch retention would affect only part of the larger school site, there is no approved block plan which is to be substituted in its entirety by this NMA; only a small constituent part of the whole school site. We have previously mentioned in the covering letter that the approved landscaping drawings for the discharge of Planning Condition 26 (for example SRP1041-ALA-ZZ-ZZ-D-L-9004 P08 - Detailed Landscape General Arrangement 2 of 2) already indicates the retention of this archway.
