Notes

Attention is drawn to the attached notes:

1 Due to the variable nature of agricultural use it is theoretically possible that the ground may have become contaminated. Contamination can occur due to fuels, chemicals, or materials stored or used in, or around structures; this includes any nearby 'farm pits'. The applicant should seek professional advice should contamination be suspected at any stage of the development, and inform the Council's Scientific Officer at the earliest opportunity.

The developer should be aware that actions or omissions on their part could lead to liability being incurred, e.g. where development fails to address an existing unacceptable risk or creates such a risk by introducing a new receptor or pathway.

More information regarding land contamination can be found on the Councils Land Pollution web page (www.ambervalley.gov.uk/environment-and-planning/pollution)

2 The council will encourage the developers to help to meet the Government's commitments to achieve net-zero carbon emissions by 2050, and to meet the NPPF's environmental objective of mitigating and adapting to climate change, including moving to a low carbon economy, through the inclusion of on-site renewable energy generation, the de-carbonising of heating systems and enhanced levels of insulation.

Reasons for Granting Permission

In granting permission for this development the Borough Council has taken into account all material planning considerations arising from the views of statutory and other consultees and public representations about the application, Government guidance as detailed in the National Planning Policy Framework and the saved policies of the Adopted Amber Valley Borough Local Plan 2006:

LS3 - Design
LS1 - Sustainability criteria
H5 - Housing development outside settlements
H12 - Design and amenity considerations
TP1 - Impact on the Transport Network
TP6 - Parking
EN1 - Countryside
EN13 - Nature Conservation

In detail:

The National Planning Policy Framework (NPPF) is a material consideration in planning decisions. In accordance with Paragraph 38 of the NPPF the local planning authority has approached the decision-making process in a positive way to foster the delivery of sustainable development and has worked proactively with the applicant/agent to secure a development to improve the economic, social and environmental conditions of the area.

Whilst the approval of this application would represent a departure from the Local Plan, the other material considerations are significant and in this instance outweigh the presumption against development in the countryside and provide justification to support the proposal. Despite being within the countryside the development is acceptable in terms of scale and character, makes efficient use of the land, a satisfactory access to the highway can be provided, there is a limited impact on the amenity of the area and there is no significant adverse impact on landscape features. Furthermore, a former planning approval has

established that the site is capable of accommodating a dwelling which is economically, socially and environmentally sustainable.
