General Notes

Drawing is to be used for initial design purposes only.

- This document shall be read in conjunction with associated models, specification and related consultant's documents.
- Whilst drawings are produced to the best possible accuracy, they have been prepared without the benefit of exposing underlying construction and therefore assumptions have been made. Therefore it is advised that all dimensions and site conditions are further investigated and independently checked by the contractor, sub-contractors prior to construction through the means of measured surveys, structural reports and ground investigations etc, in order to obtain more scaled and accurate information.
