TOWN AND COUNTRY PLANNING ACT 1990

In pursuance of the powers vested in the Amber Valley Borough Council under the above Act and Orders and taking into account Government policy and guidance and the saved policies of the Adopted Amber Valley Borough Local Plan 2006, and with reference to your application (**Office Code: AVA/2022/0121**) which was valid on the 25 February 2022 for permission for **Removal of existing stables, change of use of land from equestrian use to domestic curtilage to allow for erection of domestic garage workshop and hobby room, replacement stable block and repositioned horse walker at Mill House Farm Derby Road Lower Kilburn**

In the manner described in the application and shown on the accompanying plan(s) and drawing(s) **NOTICE IS HEREBY GIVEN** that permission for the proposed development is **GRANTED subject to the following conditions:**

Conditions/Reasons

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

   Reason: To comply with the requirements of Section 91(1) of the Town and Country Planning Act, 1990, as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

Date : 19 December 2022

Signed

S Gladwin

Simon Gladwin
Executive Director (Operations)

2. The development shall be carried out in accordance with the details contained in the submitted plans listed below and with the conditions attached to this consent:

Horse Walker Illustration received on 25th February 2022
Horse Walker Layout (drawing number CHR/101/060) received on 25th February 2022
Proposed Hobby Room, Garage and Workshop (drawing number CHR/101/05) received on 25th February 2022
Proposed Site Arrangement (drawing number CHR/101/02A) received on 25th February 2022
Propose Domestic Curtilage (drawing number CHR/101/32A) received on 5th December 2022
Proposed Stable Block (drawing number CHR/101/04C) received on 18th November 2022
Proposed Stable Block Elevations (drawing number CHR/101/03C) received on 13th November 2022
Block Plan received on 25th February 2022
Materials Schedule received on 13th November 2022

Reason: In order to define the permission.

3. All existing parking and manoeuvring space within the site shall be retained.

Reason: For the avoidance of doubt and to ensure the provision of adequate parking and manoeuvring space within the site in accordance with saved policy TP1 of the Adopted Amber Valley Borough Local Plan 2006.

Date : 19 December 2022 Signed

Simon Gladwin
Executive Director (Operations)

4. No development shall commence until;

   a) a scheme of intrusive investigations has been carried out on site to establish the risks posed to the development by past coal mining activity, and;
   b) any remediation works and/or mitigation measures to address land instability arising from coal mining legacy, as may be necessary, have been implemented on site in full in order to ensure that the site is safe and stable for the development proposed. The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.

   Reason: The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on site. This is in order to ensure the safety and stability of the development, in accordance with paragraphs 183 and 184 of the National Planning Policy Framework.

5. Prior to the occupation of the development, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.

   Reason: The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on site. This is in order to ensure the safety and stability of the development, in accordance with paragraphs 183 and 184 of the National Planning Policy Framework.

6. The hereby approved development shall remain private and ancillary to Mill House Farm, and no trade or business shall be carried out therefrom.

   Reason: For the avoidance of doubt and to safeguard the amenity of neighbouring residents in accordance with saved policy EN16 of the Adopted Amber Valley Local Plan 2006.

Date : 19 December 2022 Signed

S Gladwin

Simon Gladwin
Executive Director (Operations)

7. No development shall commence until:

   i. A letter from a competent person confirming that a coal mining risk assessment intrusive investigation did not encounter any coal mine features at shallow depth and that the ground gas risk does not require further investigation shall be submitted to and accepted in writing by the Local Planning Authority.
   ii. Should the coal mining risk assessment intrusive investigation encounter coal mine features at shallow depth, a ground gas risk assessment shall be carried out and a report submitted to and accepted in writing by the Local Planning Authority.
   iii. Where the approved risk assessment (required by ii) identifies ground gases posing unacceptable risks, a detailed scheme to address the risks shall be submitted to and accepted in writing by the Local Planning Authority.
   b. Any remedial actions required by the report submitted in fulfilment of (iii) above shall be undertaken and documented in a Verification Report which shall be submitted to and accepted in writing by the Local Planning Authority prior to the occupation of any structure.

   Reason: This is a pre-commencement of development condition necessary to ensure the site is made free from unacceptable levels of ground gas in accordance with Policy EN18 of the Adopted Amber Valley Borough Local Plan 2006.

8. The hereby approved development shall be carried out in accordance with the materials listed in the submitted Materials Sheet, received by email on 13 November 2022.

   Reason: To ensure the satisfactory appearance of the completed development in accordance with saved policies LS3 and EN27 of the Adopted Amber Valley Borough Local Plan 2006.

9. The internal block kick walls to the hereby approved stable block shall not exceed a height of 1.5 meters.

   Reason: For the avoidance of doubt and to define the terms of this permission.

Date : 19 December 2022

Signed

Simon Gladwin
Executive Director (Operations)

Notes

Attention is drawn to the attached notes:

1 In relation to condition 7, the applicant is advised that when undertaking ground gas investigation and designing gas protection measures, reference should be made to the British Standards BS8576 "Guidance on investigations for ground gas" and BS8485 "Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings"

2 Advisory/Informative Notes (It should be noted, that the information detailed below (where applicable), will be required as an absolute minimum in order to discharge any of the drainage conditions set by the LPA):
A. The County Council does not adopt any SuDS schemes at present (although may consider ones which are served by highway drainage only). As such, it should be confirmed prior to commencement of works who will be responsible for SuDS maintenance/management once the development is completed.

B. Any works in or nearby an ordinary watercourse may require consent under the Land Drainage Act (1991) from the County Council. For further advice, or to make an application please contact Flood.Team@derbyshire.gov.uk

C. No part of the proposed development shall be constructed within 3-8m of an ordinary watercourse and a minimum 3 m for a culverted watercourse (increases with size of culvert). It should be noted that DCC have an anti-culverting policy.

D. The applicant should be mindful to obtain all the relevant information pertaining to proposed discharge in land that is not within their control, which is fundamental to allow the drainage of the proposed development site.

E. The applicant should demonstrate, to the satisfaction of the Local Planning Authority, the appropriate level of treatment stages from the resultant surface water discharge, in line with Table 4.3 of the CIRIA SuDS Manual C753.

F. The County Council would prefer the applicant to utilise existing landform to manage surface water in mini/sub-catchments. The applicant is advised to contact the County Council's Flood Risk Management team should any guidance on the drainage strategy for the proposed development be required.

G. The applicant should provide a flood evacuation plan which outlines:

Date : 19 December 2022

Signed

Simon Gladwin
Executive Director (Operations)

The flood warning procedure
A safe point of extraction
How users can safely evacuate the site upon receipt of a flood warning
The areas of responsibility for those participating in the plan
The procedures for implementing the plan
How users will be made aware of flood risk
How users will be made aware of flood resilience
Who will be responsible for the update of the flood evacuation plan

H. Flood resilience should be duly considered in the design of the new building/s or renovation. Guidance may be found in BRE Digest 532 Parts 1 and 2, 2012 and BRE Good Building Guide 84.

I. Surface water drainage plans should include the following:
Rainwater
pipes, gullies and drainage channels including cover levels.
Inspection chambers, manholes and silt traps including cover and invert levels.
Pipe sizes, pipe materials, gradients and flow directions and pipe numbers.
Soakaways, including size and material.
Typical inspection chamber / soakaway / silt trap and SW attenuation details.
Site ground levels and finished floor levels.

J. On Site Surface Water Management;

The site is required to accommodate rainfall volumes up to 1 in 100 year return period (plus climate change) whilst ensuring no flooding to buildings or adjacent land.

The applicant will need to provide details and calculations including any below ground storage, overflow paths (flood routes), surface detention and infiltration areas, etc, to demonstrate how the 100 year + 30% Climate Change rainfall volumes will be controlled and accommodated, also incorporating a sensitivity test to 40% Climate change. In addition an appropriate allowance should be made for urban creep throughout the lifetime of the development (to be agreed with the LLFA).

Production of a plan showing above ground flood pathways (where relevant) for events in excess of 1 in 100 year rainfall, to ensure exceedance routes can be safely managed.

A plan detailing the impermeable area attributed to each drainage asset (pipes, swales, etc).

Date : 19 December 2022 Signed

Simon Gladwin
Executive Director (Operations)

Peak Flow Control
For greenfield developments, the peak run-off rate from the development to any highway drain, sewer or surface water body for the 1 in 1 year rainfall event and the 1 in 100 year rainfall event, should never exceed the peak greenfield run-off rate for the same event.

For developments which were previously developed, the peak run-off rate from the development to any drain, sewer or surface water body for the 1 in 1 year rainfall event and the 1 in 100 year rainfall event must be as close as reasonably practicable to the greenfield run-off rate from the development for the same rainfall event, but should never exceed the rate of discharge from the development, prior to redevelopment for that event.

Volume Control
For greenfield developments, the runoff volume from the development to any highway drain, sewer or surface water body in the 1 in 100 year, 6 hour rainfall event must not exceed the greenfield runoff volume for the same event

For developments which have been previously developed, the runoff volume from the development to any highway drain, sewer or surface water body in the 1 in 100 year, 6 hour rainfall event must be constrained to a value as close as is reasonably practicable to the greenfield runoff volume for the same event, but must not exceed the runoff volume for the development site prior to redevelopment for that event.

Note:- If the greenfield run-off for a site is calculated at less than 2 l/s, then a minimum of 2 l/s could be used (subject to approval from the LLFA).

Details of how the on-site surface water drainage systems shall be maintained and managed after completion and for the lifetime of the development to ensure the features remain functional.

Where cellular storage is proposed and is within areas where it may be susceptible to damage by excavation by other utility contractors, warning signage should be provided to inform of its presence. Cellular storage and infiltration systems should not be positioned within the highway.

Guidance on flood pathways can be found in BS EN 752.

Date : 19 December 2022

Signed

Simon Gladwin
Executive Director (Operations)

The Greenfield runoff rate which is to be used for assessing the requirements for limiting discharge flow rates and attenuation storage for a site should be calculated for the whole development area (paved and pervious surfaces - houses, gardens, roads, and other open space) that is within the area served by the drainage network whatever size of the site and type of drainage system. Significant green areas such as recreation parks, general public open space etc., which are not served by the drainage system and do not play a part in the runoff management for the site, and which can be assumed to have a runoff response which is similar to that prior to the development taking place, may be excluded from the greenfield analysis.

K. If infiltration systems are to be used for surface water disposal, the following information must be provided:
Ground percolation tests to BRE 365.
Ground water levels records. Minimum 1m clearance from maximum seasonal groundwater level to base of infiltration compound. This should include assessment of relevant groundwater borehole records, maps and on-site monitoring in wells.
Soil / rock descriptions in accordance with BS EN ISO 14688-1:2002 or BS EN ISO 14689-1:2003.
Volume design calculations to 1 in 100 year rainfall + 30% climate change standard. An appropriate factor of safety should be applied to the design in accordance with CIRIA C753 – Table 25.2.
Location plans indicating position (soakaways serving more than one property must be located in an accessible position for maintenance). Soakaways should not be used within 5m of buildings or the highway or any other structure.
Drawing details including sizes and material.
Details of a sedimentation chamber (silt trap) upstream of the inlet should be included.
Soakaway detailed design guidance is given in CIRIA Report 753, CIRIA Report 156 and BRE Digest 365.
L. All Micro Drainage calculations and results must be submitted in .MDX format, to the LPA. (Other methods of drainage calculations are acceptable.)

M. The applicant should submit a comprehensive management plan detailing how surface water shall be managed on site during the construction phase of the development ensuring there is no increase in flood risk off site or to occupied buildings within the development.

Date : 19 December 2022

Signed

Simon Gladwin
Executive Director (Operations)

3 Under the Coal Industry Act 1994 any intrusive activities, including initial site investigation boreholes, and/or any subsequent treatment of coal mine workings/coal mine entries for ground stability purposes require the prior written permission of The Coal Authority, since such activities can have serious public health and safety implications. Failure to obtain permission will result in trespass, with the potential for court action. In the event that you are proposing to undertake such work in the Forest of Dean local authority area our permission may not be required; it is recommended that you check with us prior to commencing any works. Application forms for Coal Authority permission and further guidance can be obtained from The Coal Authority's website at:
https://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

Reasons for Granting Permission

In granting permission for this development the Borough Council has taken into account all material planning considerations arising from the views of statutory and other consultees and public representations about the application, Government guidance as detailed in the National Planning Policy Framework and the saved policies of the Adopted Amber Valley Borough Local Plan 2006:

LS1 - Sustainability criteria
LS3 - Design
TP1 - Impact on the Transport Network
TP6 - Parking
EN2 - Green Belt
EN18 - Derelict, Unstable And Contaminated Land
EN27 - Conservation Areas
EN15 - Development and Flood Risk
LC14 - Horse Riding Facilities

In detail:

The National Planning Policy Framework (NPPF) is a material consideration in planning decisions. In accordance with Paragraph 38 of the NPPF the local planning authority has approached the decision making process in a positive way to foster the delivery of sustainable development and has worked proactively with the applicant/agent to secure a development to improve the economic, social and environmental conditions of the area.

The development complies with the provisions of the development plan for the locality and raises no unresolved issues in relation to the location of the site, privacy, amenity, character and design, landscape or heritage features and highway safety.

Date : 19 December 2022 Signed

Simon Gladwin
Executive Director (Operations)

NOTES

1. **If the applicant is aggrieved by the decision of the Local Planning Authority to refuse planning permission or approval for the proposed development or to grant permission or approval subject to conditions, he may appeal to the Secretary of State for the Environment in accordance with Section 78/79 of the Town and Country Planning Act 1990, within six months of the date of this notice. The Secretary of State has power to allow a longer period for the giving of a notice but will not normally be prepared to exercise this power unless there are special circumstances which excuse the delay in giving notice of appeal. The Secretary of State is not required to entertain an appeal if it appears to him that permission of the proposed development could not have been granted by the Local Planning Authority or could not have been so granted otherwise that subject to the conditions imposed on them, having regard to the statutory requirements, to the provision of the development order, and to any directions given under the order.**
2. **Cadent Gas own and operate the gas infrastructure within the area of your development. Contact Cadent's Plant Protection Team for approval before carrying out any works on site and ensuring requirements are adhered to. Email plantprotection@cadentgas.com. Alternatively you can register on www.beforeyoudig.nationalgrid.com**
3. **If permission to develop land is refused or granted subject to conditions, whether by the Local Planning Authority or by the Secretary of State for the Environment, and the owner of the land claims that the land has become incapable of reasonably beneficial use in its existing state and cannot be rendered capable of reasonably beneficial use by the carrying out of any development which has been or would be permitted, he may serve on the Council of the County/District in which the land is situated, a purchase notice requiring that council to purchase his interests in the land in accordance with the provisions of Section 180 of the Town and Country Planning Act 1990.**
4. **In certain circumstances a claim may be made against the Local Planning Authority for compensation where permission is refused or granted subject to conditions by the Secretary of State on appeal or on a reference of the application to him. The circumstances in which such compensation is payable are set out in Sections 137 and 138 of the Town and Country Planning Act 1990.**
5. **This permission relates to planning controls only. Any other statutory consent necessary including submission under the building regulations must be obtained from the appropriate Authority.**
6. **If it is intended to give notice of appeal in accordance with Paragraph 1 above, this should be done on the appropriate form obtainable from:-**

   The Planning Inspectorate
   3/23 Hawk Wing, Temple Quay House, 2 The Square Temple Quay Bristol BS1 6PN
   (Tel. No. 0117 372 8000) www.planning-inspectorate.gov.uk

7. **If the condition of consent or reasons for refusal, make reference to a Division of the Department, the appellant may, if he so wishes, require the attendance of a representative from the Department by notification to the Local Planning Authority. Such a representative would not be liable to cross-examination on questions of departmental policy, but only on matters of fact and expert opinion in relation to the appeal site.**
8. **Where a vehicle is habitually drive across a grass verge or kerbed footway to and from premises adjoining a highway, the occupier of the premises may after being given due notice by the appropriate authority, be required to pay the cost of construction of a carriage crossing or the strengthening of a footway, as the authority considers it necessary, or may be required to comply with conditions imposed by the authority.**
9. **In the case of building or premises to which the public are to be admitted whether on payment or otherwise, attention is drawn to Sections 4 and 7 of the Chronically Sick and Disabled Persons Act 1970 and the associated Code of Practice (BS5810:1979). In the case of premises to which the Offices, Shops and Railway Premises Act 1963 or the Factories Act 1962 applies, attention is drawn to Sections 7 and 8A of the Chronically Sick and Disabled Persons Act and to the same code of practice. In the case of Educational Buildings, attention is drawn to Sections 7 and 8 of the Chronically Sick and Disabled Persons Act 1978 and to the Design Note 18 "Access for the Physically Disabled Educational Buildings".**
10. **If the development site is crossed by an electric line or is within 15 metres (50ft) of the nearest part of a line (measure horizontally along the ground) or if there is reason to believe that it may be crossed by an underground electric cable, the applicant should contact the Electricity Board to ascertain if and what special safety precautions are necessary.**
11. **The grant of planning permission does not entitle developers to obstruct a public right of way. Development on so far as it affects a right of way, should not be started, and the right of way should be kept open for public use, until the necessary order under Section 247 and 257 of the Town and Country Planning Act 1990 for the diversion of extinguishment of the right of way has been made and confirmed.**
