Notes
Attention is drawn to the attached notes:

1 The proposed development lies within an area that has been defined by the Coal Authority as containing potential hazards arising from former coal mining activity at the surface or shallow depth. These hazards can include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such hazards are seldom readily visible, they can often be present and problems can occur in the future, particularly as a result of new development taking place.

   It is recommended that information outlining how former mining activities may affect the proposed development, along with any mitigation measures required (for example the need for gas protection measures within the foundations), is submitted alongside any subsequent application for Building Regulations approval (if relevant).
   Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks.

As a general precautionary principle, the Coal Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure that a suitable engineering design which takes into account all the relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Coal Authority Policy in relation to new development and mine entries available at:

Reasons for Granting Permission

In granting permission for this development the Borough Council has taken into account all material planning considerations arising from the views of statutory and other consultees and public representations about the application, Government guidance as detailed in the National Planning Policy Framework and the saved policies of the Adopted Amber Valley Borough Local Plan 2006:

LS1 - Sustainability criteria
LS3 - Design
ER6 - Rural economy
ER12 - Tourism
EN1 - Countryside
EN7 - Landscape Character Areas
TP1 - Impact on the Transport Network
TP6 - Parking

In detail:

Whilst the approval of this application would represent a departure from the Local Plan, the other material considerations are significant and in this instance outweigh the presumption against development in the countryside and provide justification to support the proposal. Despite being within the countryside the development is acceptable in terms of scale and character, makes efficient use of the land, a satisfactory access to the highway can be provided, there is a limited impact on the amenity of the area and there is no significant adverse impact on landscape features.
