For the attention of Alan Redmond

Your Ref: AVA/2025/0668
Our ref: DWTAVA2155a

25th November 2025

Dear Alan,

Proposal: Outline application for development of up to 49 dwellings including affordable housing, enhanced public right of way, equipped play area, public amenity space and habitat creation.

Location: Land At Moor Lane Moor Lane Kirk Langley Ashbourne Derbyshire

Application Ref No.: AVA/2025/0668

With reference to the above application, I am responding as the Biodiversity Planning Officer responsible for work relating to the Service Level Agreement, which the Amber Valley Borough Council and the Trust have signed. The following comments are aimed at providing accurate and up to date information on the nature conservation issues associated with the proposed development.

Response overleaf

Derbyshire Wildlife Trust

Further to our letter dated 12th November 2025, we have been made aware of a revised Biodiversity Net Gain Report and metric (Elton Ecology, November 2025).

Our previous concerns regarding the on-site habitat creation and enhancement appear to have been addressed sufficiently and the proposals now result in a +0.79 gain in habitat units, equating to +15.29% and a +1.53 gain in hedgerow units, equating to +43.45% with trading rules satisfied. We advise that a Habitat Management and Monitoring Plan (HMMP) would be suitable in order to secure the gains.

The statutory framework for biodiversity net gain requires a Biodiversity Gain Plan to be submitted and approved by the planning authority to discharge the mandatory biodiversity gain condition prior to the commencement of development.

Guidance for LPAs regarding Gain Plans can be found here: https://www.gov.uk/guidance/biodiversity-net-gain#para25 and the Gain Plan template is here: https://www.gov.uk/government/publications/biodiversity-gain-plan

Our previous comments regarding habitats and species can be found in our letter dated 15th November 2025 (DWTAVA2155).

Conditions

Construction Environmental Management Plan (CEMP: Biodiversity)

No development shall take place (including demolition, ground works, vegetation clearance and movement of plant, machinery and materials) until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and

approved in writing by the local planning authority. The CEMP (Biodiversity) shall be produced by an ecologist and shall include the following.

a) Risk assessment of potentially damaging construction activities.
b) Identification of "biodiversity protection zones".
c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction.
d) The location and timing of sensitive works to avoid harm to biodiversity features.
e) The times during construction when specialist ecologists need to be present on site to oversee works.
f) Responsible persons and lines of communication.
g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

Lighting

Prior to the installation of lighting fixtures, a detailed lighting strategy shall be submitted to and approved in writing by the LPA to safeguard bats and other nocturnal wildlife. This should provide details of the chosen luminaires, their locations and any mitigating features such as dimmers, PIR sensors and timers. Dependent on the scale of proposed lighting, a lux contour plan may be required to demonstrate acceptable levels of lightspill to any sensitive ecological zones/features. The Strategy should refer to Guidance Note 08/23 - Bats and Artificial Lighting at Night (BCT and ILP, 2023) and explain how proposals have

been designed in compliance with this document. Such approved measures will be implemented in full.

Habitat Management and Monitoring Plan

A Habitat Management and Monitoring Plan (HMMP) shall be submitted to, and be approved in writing by, the LPA prior to the commencement of the development. If the standard HMMP template is not used, the HMMP checklist shall be consulted to ensure all appropriate information is included. The HMMP shall identify the habitats to be retained, created and / or enhanced on the site over the mandatory 30-year period and specify the appropriate management prescriptions to secure the predicted condition targets, as per the approved biodiversity metric for the application. The HMMP shall also set out a monitoring schedule to ensure targets are met and remedial actions to take if not. Guidance on producing a HMMP can be found here:
https://www.gov.uk/guidance/creating-a-habitat-management-and-monitoring-plan-for-biodiversity-net-gain

Species Enhancement Plan

Prior to building works commencing above foundation level, a Species Enhancement Plan shall be submitted to and approved in writing by the Local Planning Authority. Approved measures shall be implemented in full and maintained thereafter. The Plan shall clearly show positions, specifications and numbers of features, which will include (but are not limited to) the following:

- universal nest boxes at ratio of 1:1, in line with British Standard 42021:2022.
- integrated bat boxes in 30% of dwellings.
- insect bricks in 30% dwellings and / or towers in public open space.

• fencing gaps 130 mm x 130 mm to maintain connectivity for hedgehogs in all gardens.

A statement of good practice including photographs should be submitted to the local planning authority prior to the discharge of this condition, demonstrating that the enhancements have been selected and installed in accordance with the above.

It is hoped that the information provided is helpful to the Council. If you require any further information or wish to discuss any of the comments made, please do not hesitate to contact me.

Yours sincerely,

Holly Fowler
