Ref	Tree	Number of tree	Recommendation
G004	Beech	18	Heavily reduce tree with Ganoderma down to 10m in height. Reducing sides in hard to create compact form.Reduce tall slender tree next to tree with cavity to a height below neighbouring trees, 5-6 metres.Fell small tree next to tree with included bark with dead disfunctional wood in main stem.
T019	Leyland Cupress	1	Reduce height of tree by 6m to eliminate stress on branches
T002	Holly	2	Crown reduce smaller stem by 2m to create dominant stem
T006	Wild Cherry	1	Crown reduce by 2m to eliminate weight on end of branches in order to reduce chances of failure and to control root disruption
T015	Yew	1	Crown lift to 2.5 m including epicormic. Sever ivy.
G003	Whitebeam	2	Due to overextended branches from previous pollard and wind exposure a crown reduction in height of upto 60% whilst sensitively pruning the sides to create a nice shape. Remove deadwood.
T010	Crab apple	1	Consider felling as likely to fail unexpectedly
T017	Perdunculate Oak	1	Crown lift to 3m for pedestrian clearance
T020	Cultivare apple	1	Remove failed branches. Crown lift to 2.5m
T021	Crab apple	1	Consider felling as likely to fail unexpectedly
