Choice Of Contractor

The Council recommends that a competent arboricultural contractor carries out this work (see enclosed leaflet 'Tree Work – Choosing Your Arborist'). Whilst the Council do not recommend or assess any individuals or companies it does recognise the Arboricultural Association Approved Contractor scheme as being the best way of assuring the professional competence of companies engaged in tree work.

Details of Arboricultural Association Approved Contractors can be obtained from their website - www.trees.org.uk or by telephone – 01242 522152.

Any permission given in this letter satisfies the requirement for consent prior to carrying out works to a tree covered by a Tree Preservation Order (TPO). It does not give you any legal right to carry out works to a tree which is not under your ownership.

If permission is granted to work on a tree protected by TPO, you do have the right to remove any branches from a tree on neighbouring land which overhang your boundary. You can do this without the consent of the owner, but you must offer to return any removed branches to them. However, you cannot enter the neighbouring land to carry out the works without the owner's permission (climbing the tree would be considered entering the land). This also applies to any works to parts of the tree which do not overhang your boundary. These will all need the consent of the land/tree owner.

Tree works must be carried out in a way that does not disturb wild birds or other protected species. All wild birds are protected. This includes their nests (whilst in use or being built) as well as any eggs the nest may contain. Under the Wildlife and Countryside Act 1981 (as amended), it is an offence to:

- intentionally kill, injure or take any wild bird
- intentionally damage, destroy or take the nest of any wild bird while it is in use or being built
- intentionally destroy an egg of any wild bird
- intentionally or recklessly disturb certain wild birds or their dependent young while they are nesting (including disturbance of nesting young)

Although within the Wildlife and Countryside Act no dates are legally stated, the main bird breeding season is recognised as being between 1 March and 31 July. Therefore the risk of committing any of the above offences is increased between these dates. It is recommended that if any works are carried out within these dates a thorough check for any signs of breeding activity should be carried out first.
