Heritage Statement

I am fully aware that my property is in a conservation area, Article 4 and World Heritage site. With that in mind my new window and door replacement application is in keeping with my neighbours and the historic significance of the property and the area. I feel that my choices, within planning and building regulations, will enhance and blend with the other properties on Derwent View and be in no way detrimental to the environment.

The addition of a horizontal glazing bar will improve aesthetic proportions, the flying mullions will improve means of escape for fire safety and concealed trickle vents will keep the traditional appearance.
