Choosing Solidor®

We understand that knowing your home and family are protected is a major factor when choosing a new door.

You can rest assured that with our door construction, coupled with our unique, reinforced door frame and Secured by Design locking systems, your home will be as safe as can be when you choose Solidor.

A *typical* **foam filled** door construction

Solidor's *unique* **solid timber** construction

40mm Foam Filled Centre performs thermally, but because this is a foam fill it is neither solid, nor secure.

Visible Edge Banding as a result you will often see a different coloured line running the length of the door.

Gel Coated GRP Outer Skin may offer protection but can be easily cut through. Also, because every door is a white blank that is surface painted they show scratches very easily.

3 Chamber Profile which use valuable steel or aluminium reinforcements. Also, you should check if they are lead free.

44mm Solid Timber Core (48mm including skin) that is thermally efficient and extremely secure.

Hidden Edge Banding so the front of your door remains a solid, glorious slab of colour.

'Through' Colour ABS Skins made from the same durable plastic as Lego©. Also, because the entire skin is made of a solid colour, any scratches are practically hidden.

Lead Free, 5 Chamber Profile which uses 100% recycled reinforcing. Generally, the more chambers that a profile uses, the stronger and more thermally efficient they are.

Wood Grain Effect Skin that gives all of the aesthetics of timber, but without the time consuming maintenance.
