Supporting information

The ground floor bay window that will be replaced will be constructed of Acoya wood and decorated in a white finish.

All roof materials will be stripped and put to one side for re-use. The existing ridge tiles will also be put to one side or replaced on a like for like basis if necessary. Any broken slate will be replaced on a like for like basis both in size and colour with reclaimed Welsh to match. Samples cannot be supplied until the work starts. All slate will be fixed on tanalised roofing battens , 50 x 25mm, affixed with suitable galvanised nails over Tyvek breathable membrane. Suitable, non rigid insulation will be applied between the rafters to a suitable depth determined on site.
