Supporting statement outlining the reason and justification for the proposed change of use.

a. “The reason and justification for the proposed change of use is so we can utilise the recently acquired land (outlined in red) as domestic garden (and/or ratify that it is already registered as land for domestic use). The area of land in question is not in productive agricultural use, it never has been, and the owner has no interest in promoting any kind of agricultural practices. The proposed use of the land as a garden is a natural extension of the existing residential property which represents a logical adjustment, bringing an unused piece of land into a positive, managed domestic state without conflicting with any rural or agricultural protections in any way."
