Derwent Valley Mills
inscribed on the World
Heritage List in 2001

Our Discovery Walks Festival brings you 49 delightful walks with something for everyone to enjoy.

Experience a charming blend of breathtaking natural scenery, fascinating industrial heritage and pure spectacle in the Derwent Valley - the Valley that changed the World.

Designated as a World Heritage Site in 2001, the Derwent Valley Mills have been described as the birthplace of the industrial revolution. It was here in the Derwent Valley that the essential ingredients of factory production were successfully combined.

Water power was applied and successfully used for the first time on a relatively large scale. Not only was textile production revolutionised with dramatic consequences for the British economy, but also the Arkwright model informed and inspired developments in other industries.

Each site has its own story to tell; stories of pioneering engineers and entrepreneurs who put Britain on the map and set off a chain of events that changed how we live and work forever.

We think you will find that our walks offer something for everyone, whether you are interested in the cultural heritage, the industrial history, the people who made it, or just want to enjoy the glorious landscapes of this fascinating valley. There's a choice of time - morning, afternoon, evening; a choice of length - from a 200 yard stroll to a 7 mile hike; as well as a choice of appealing routes. Some walks have been carefully chosen to include visits to some of the World Heritage Site's iconic buildings, whilst others will take you a little more off the beaten track!

Charges and Paying:

Please check each walk for price. Children under 12 go free unless otherwise stated under a specific walk.
